

• PARTNERSHIP PROPOSAL · VOLUME II OF V

A second revenue line for every **US clinic** Leverage already speaks to.

Every time Leverage Careers places an Indian-trained nurse into a US independent practice, that practice becomes a customer with a budget for one thing: **running their billing properly**. Halcyon already serves that buyer. We'd like to be the second product on every Leverage Careers employer call — and pay you a recurring commission for the introduction.

THE OBSERVATION

You already have the conversation. We just need 30 seconds of it.

Leverage Careers' Work Global team is in active dialogue with US independent practices every week — selling them on hiring an H1B-sponsored RN or NP from your Indian and ANZ pipeline. Those practices are 1–10 providers, billing insurance, often understaffed on admin. They are *identical to Halcyon's ICP*.

Today: Leverage Careers makes one sale per employer conversation — a placement fee. The conversation ends. The relationship goes dormant until the next req.

Tomorrow: at the close of every employer call, the Leverage Careers rep adds one line — *"Quick heads-up — we partner with a US-side billing company called Halcyon. They handle the full revenue cycle for practices like yours. Want a 20-min intro?"* That single sentence, asked of an already-warm employer, converts at materially higher rates than any cold channel either of us can buy.

For Leverage Careers: a second monetisable conversation per employer, with no incremental rep effort and a recurring annuity tail that compounds across every clinic in your placement book.

WHY NOW

The TNSDC pipeline scales the buyer pool.

Leverage Careers' nursing placements grow the count of US independent practices in your active CRM — every one of them is a Halcyon prospect.

WHY US

Halcyon is the only billing partner with a portal practices can actually see.

The real-time client portal isn't marketing — it's the wedge that wins us the demo. Practices outsource billing for visibility, not just labour. We deliver both.

WHAT HALCYON IS

Full-cycle billing for US independent practices.

We run the entire revenue cycle for clinics that don't have time to manage it in-house: eligibility verification, charge capture, coding, claim submission, denial work, payment posting, AR follow-up, and patient billing. We deliver a 96% target first-pass acceptance rate and a real-time client portal so the practice sees every claim, payment, and denial as it happens.

COMPLIANCE

HIPAA · HITECH · BAA-stack

Halcyon Medical Billing LLP is fully registered. Field-level PHI encryption, append-only audit trail, BAAs with every vendor.

OPERATING MODEL

12-step RCM workflow, 60–90 day results

Practices typically see AR days drop and denial rates fall within the first two billing cycles. Our model is built for measurable, fast turnaround.

BUYER FIT

1–10 provider clinics across 6+ specialties

Primary care, internal medicine, cardiology, psychiatry, orthopedics, family medicine. The exact clinics Leverage Careers places nurses into.

THE BUNDLE

One employer call. Two revenue lines.

The bundle is structurally simple. At the close of every Leverage Careers employer conversation — whether that's a Vellore-trained RN going to a Texas primary care practice or an N3-certified caregiver heading to Japan — the rep offers a one-line handoff: *"We work with a billing partner called Halcyon. Want a 20-min intro?"*

From there, Halcyon takes the meeting, runs the demo, sends the contract, and onboards. Leverage Careers receives 25% of the practice's first-month Halcyon fee on signature and 10% recurring on every monthly invoice for the lifetime of the relationship. No cap. No clawback after month one. Auto-paid via ACH/wire.

We propose **two integration depths** — pick the one that's least disruptive to your team's existing playbook.

INTEGRATION · LIGHT

Email handoff template

Leverage Careers reps send a standard three-way intro email at close of placement — no CRM changes, no new fields. Halcyon's CRM tracks attribution; Leverage gets a monthly statement and a single ACH payout.

INTEGRATION · DEEP

Co-branded landing page + UTM

A halcyon.leverageedu.com (or similar) sub-page; UTM-tagged outbound; live in the existing partner dashboard. Reports flow to Leverage's existing analytics. Two-week build on Halcyon's side.

COMPLIANCE

No PHI flows through Leverage

Leverage is not a Business Associate under HIPAA. No patient data, no BAA required on Leverage's side. The introduction ends at the practice owner; Halcyon's BAA covers everything downstream.

THE HONEST MATH

Per practice that signs & stays.

Halcyon doesn't pay channel partners a salary, retainer, or upfront fee. The economics are 100% performance-based — they kick in only once a referred practice signs a contract and pays its first invoice. From there: **25%** of the practice's first-month Halcyon fee, paid once. **10%** of every subsequent monthly fee, recurring as long as the practice stays. No cap. No expiry.

PRACTICE SIZE	HALCYON FEE / MO	MONTH-1 COMMISSION	RECURRING / MO	YEAR 1 / PRACTICE	YEAR 2 / PRACTICE
Small primary care \$75K/mo collections	\$3,750	\$938	\$375	\$5,063	\$4,500
Mid-range \$130K/mo collections	\$6,500	\$1,625	\$650	\$8,775	\$7,800
Multi-specialty \$250K/mo collections	\$12,500	\$3,125	\$1,250	\$16,875	\$15,000

What Leverage Careers stands to make = (practices that sign through this channel) × (per-practice revenue above). We are not projecting a number of closes. That depends on bundle-ask adoption, employer fit, and rep follow-through. The numbers above are what's structurally guaranteed once a practice signs and stays.

Illustrative volume — mid-range practice size: **5 closes** = \$43,875 Yr-1 / \$39,000/yr recurring · **10 closes** = \$87,750 Yr-1 / \$78,000/yr recurring · **20 closes** = \$175,500 Yr-1 / \$156,000/yr recurring.

What's a "close"? A US practice that signs a Halcyon MSA *and* has paid its first monthly invoice — at which point Halcyon issues the channel-commission ACH to Leverage. No commission on demos, MOUs, or unsigned proposals. Halcyon eats 100% of the cost of getting from intro to signature, including all sales effort post-handoff from the Leverage Careers rep.

WHAT WE'RE ASKING

A 25-minute call with the CBO or COO.

We want to talk to whoever owns the Leverage Careers commercial relationship with US employers. Halcyon's CEO + CFO will join. We bring a one-page integration spec, a Referral Partner Agreement template, and a list of practice profiles we'd start with.

STEP · 01

25-min commercial fit call

Walkthrough of the bundle, integration depths, payout mechanics, and Halcyon's portal demo. Bring objections — we'll address every one.

STEP · 02

10-employer pilot

Pick 10 active Leverage Careers employer accounts. Add the bundle ask to those 10 calls. Track conversion. 60-day pilot — no commitment beyond.

STEP · 03

Scale across Work Global

If pilot conversion lands above 15%, full rollout across Work Global — nursing, caregiver, and non-healthcare verticals where the buyer profile fits.

REPLY WITH AVAILABILITY BEFORE 27 MAY 2026 · NAITIK@HALCYONMEDBILLING.COM

WHO YOU'D BE WORKING WITH

Senior counterparts on every call.

CEO & CTO · SENDER

Naitik Joshi · SENDER

Architected the HIPAA portal, encryption layer, and the 12-step RCM workflow. Will run the integration spec walkthrough and the technical demo personally.

COO · OPERATIONS

Ankit Chauhan

Owns billing operations and onboarding. Handles every signed practice's first 90 days personally to ensure retention KPIs hold.

CFO · FINANCE

Rushan Khan

Owns commission disbursements and the Referral Partner Agreement. Direct counterpart to Leverage's CBO / COO / Chief Partnerships Officer for this proposal.

COMPLIANCE

- Halcyon Medical Billing LLP — registered, audited, in good standing
- HIPAA & HITECH technical safeguards in place
- Leverage is not a BA under HIPAA — no PHI flows through your stack
- Lawyer-reviewed MSA & Referral Partner Agreement available on request
- Quarterly attestation reports issued to all channel partners
